DETAILED ACTION

This is the first action relating to serial application number 10/590,253 filed 08/17/2006. Claims 1-8 are currently pending.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The examiner has accepted the drawing filed with this application as formal drawing.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by JP (2003-314541). JP (2003-314541) discloses an oblique contact roller bearing (27A/27B) comprising a double row of balls (18) inter posed between raceways (11/13; 12/14), an inner clearance between the balls (18); an inner clearance (α^2) between the balls in one or the rows and the raceway in which the ball are rolled and an inner clearance (β^1) between the balls in a row and the raceway in which the balls are rolled are different to each other.

In claim 2, note the inner clearance (α^2), (β^1) is a radial clearance.

Art Unit: 3682

In claim 3, it is apparent that the pitch circle diameters (D 1, D 2) of both rows of balls are different.

In claim 4, it should be noted that the contact angles (shown but not labeled; see dotted lines diagonally across the balls (18) in of the balls with the races in each row has the same direction.

In claims 5-8, it is apparent that the method steps are inherently included during assembling of the bearing of JP (2003-314541).

Citation

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the prior art cited in attached PTO Form 892.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marcus Charles whose telephone number is (571) 272-7101. The examiner can normally be reached on Monday-Thursday 7:30 am to 6:00 pm.
